

It's Never too Late: Ensuring Older Striving Readers Succeed

Linda Diamond
Rachel Brown, Ph.D., NCSP
October 20, 2022

Today's Presenters

Linda Diamond

*Author of *Teaching Reading Sourcebook* and *Assessing Reading: Multiple Measures**

Rachel Brown, Ph.D., NCSP

University of Southern Maine
Senior Research Consultant,
Renaissance Learning

Objectives

Recognize the impacts of poor reading skills on older students

Understand the learning challenges of upper elementary and older students

Receive web-based resources

Learn the 3 profiles of reading difficulty experienced by older students

Understand what is needed for upper elementary and older students to overcome reading difficulties: assessment, targeted instruction, effective materials, knowledgeable educators

What is the Science of Reading?

The science of reading is a vast, interdisciplinary body of *scientifically-based** research about reading and issues related to reading and writing. This research has been conducted over the last five decades across the world, and it is derived from thousands of studies conducted in multiple languages. The science of reading has culminated in a preponderance of evidence to inform how proficient reading and writing develop; why some have difficulty; and how we can most effectively assess and teach and, therefore, improve student outcomes through prevention of and intervention for reading difficulties.

* **The science of reading** is derived from researchers from multiple fields: cognitive psychology, communication sciences, developmental psychology, education, special education, implementation science, linguistics, and neuroscience.

<https://www.thereadingleague.org/what-is-the-science-of-reading/>

*This IS **NOT** the science of reading*

And this IS **NOT** the science of reading either

The Simple View of Reading

**Gough and Tunmer in 1986, Updated 1990, 2019*

Example:

$$.50 \times .50 = .25$$

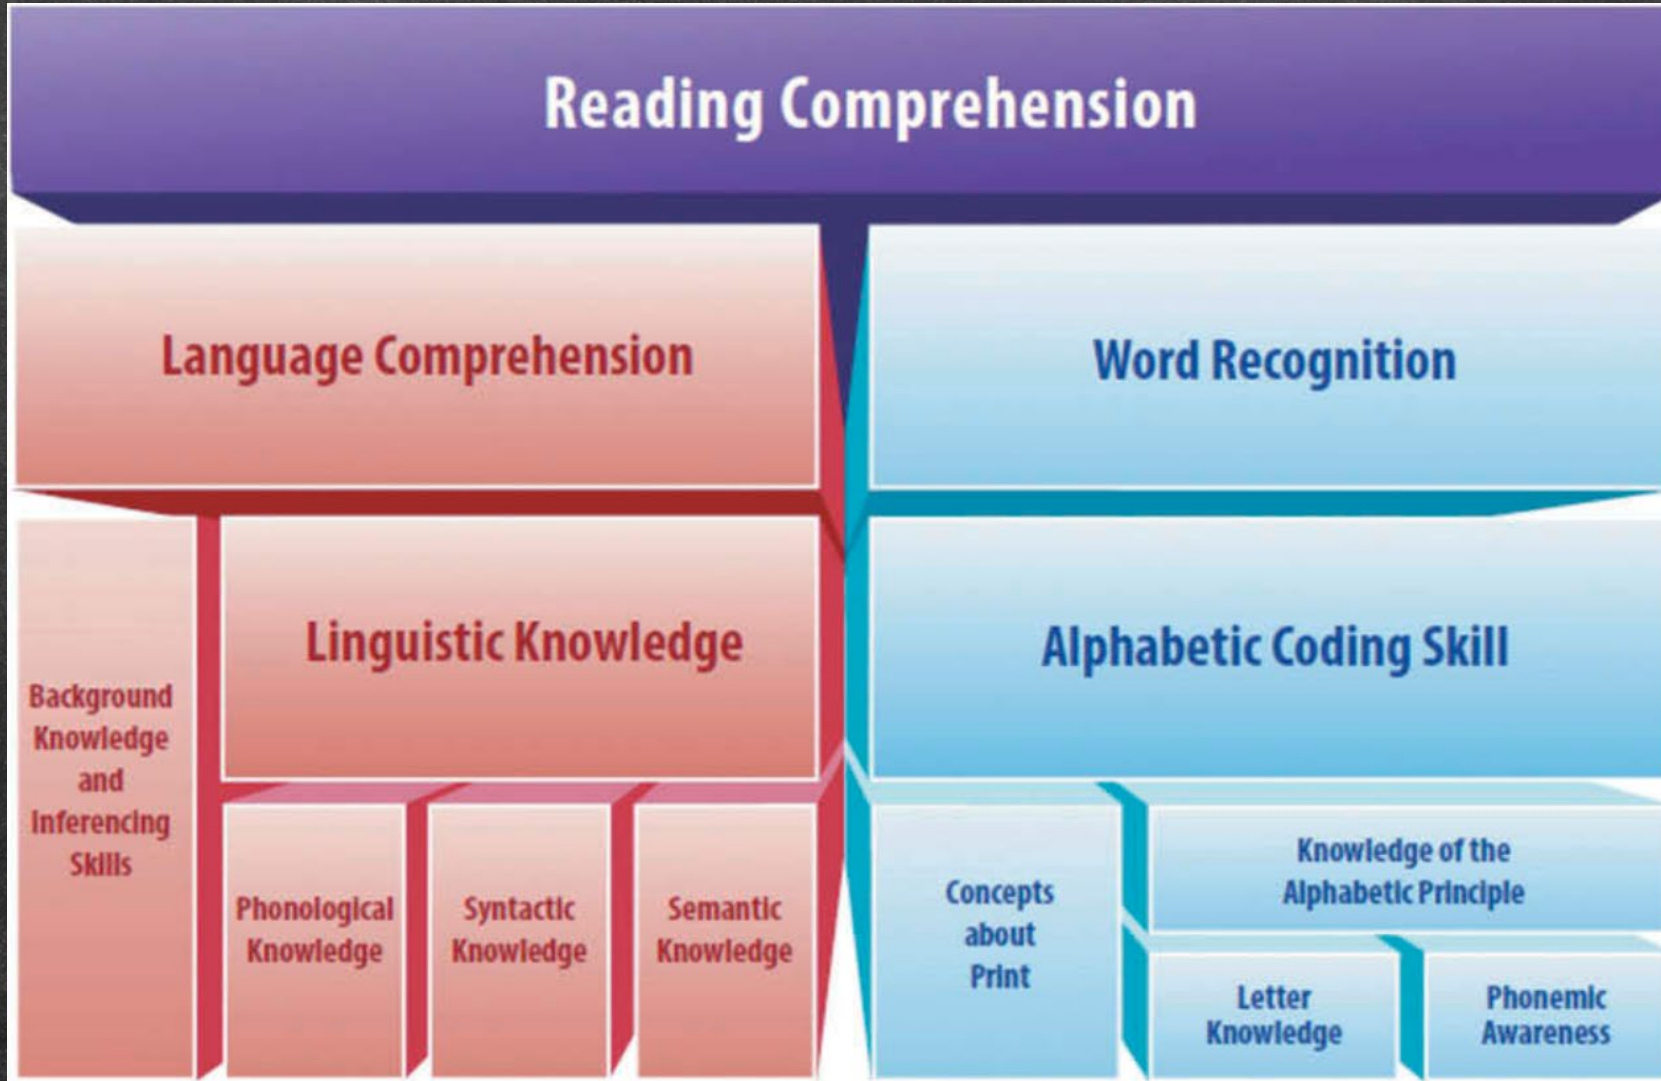

$$1.0 \times 1.0 = 1$$

$$.25 \times 1.0 = .25$$

$$1.0 \times .25 = .25$$

The Cognitive Component Model of the Simple View

The Reading Rope

Scarborough's Rope is a theoretical framework to illustrate which foundational components (represented by each strand) are correlated with later skilled reading.

LANGUAGE COMPREHENSION

Background Knowledge
(facts, concepts, etc.)

Vocabulary
(breadth, precision, links, etc.)

Language Structures
(syntax, semantics, etc.)

Verbal Reasoning
(inference, metaphor, etc.)

Literacy Knowledge
(print concepts, genres, etc.)

WORD RECOGNITION

Phonological Awareness
(syllables, phonemes, etc.)

Decoding
(alphabetic principle, spelling-
sound correspondences)

Sight Recognition
(of familiar words)

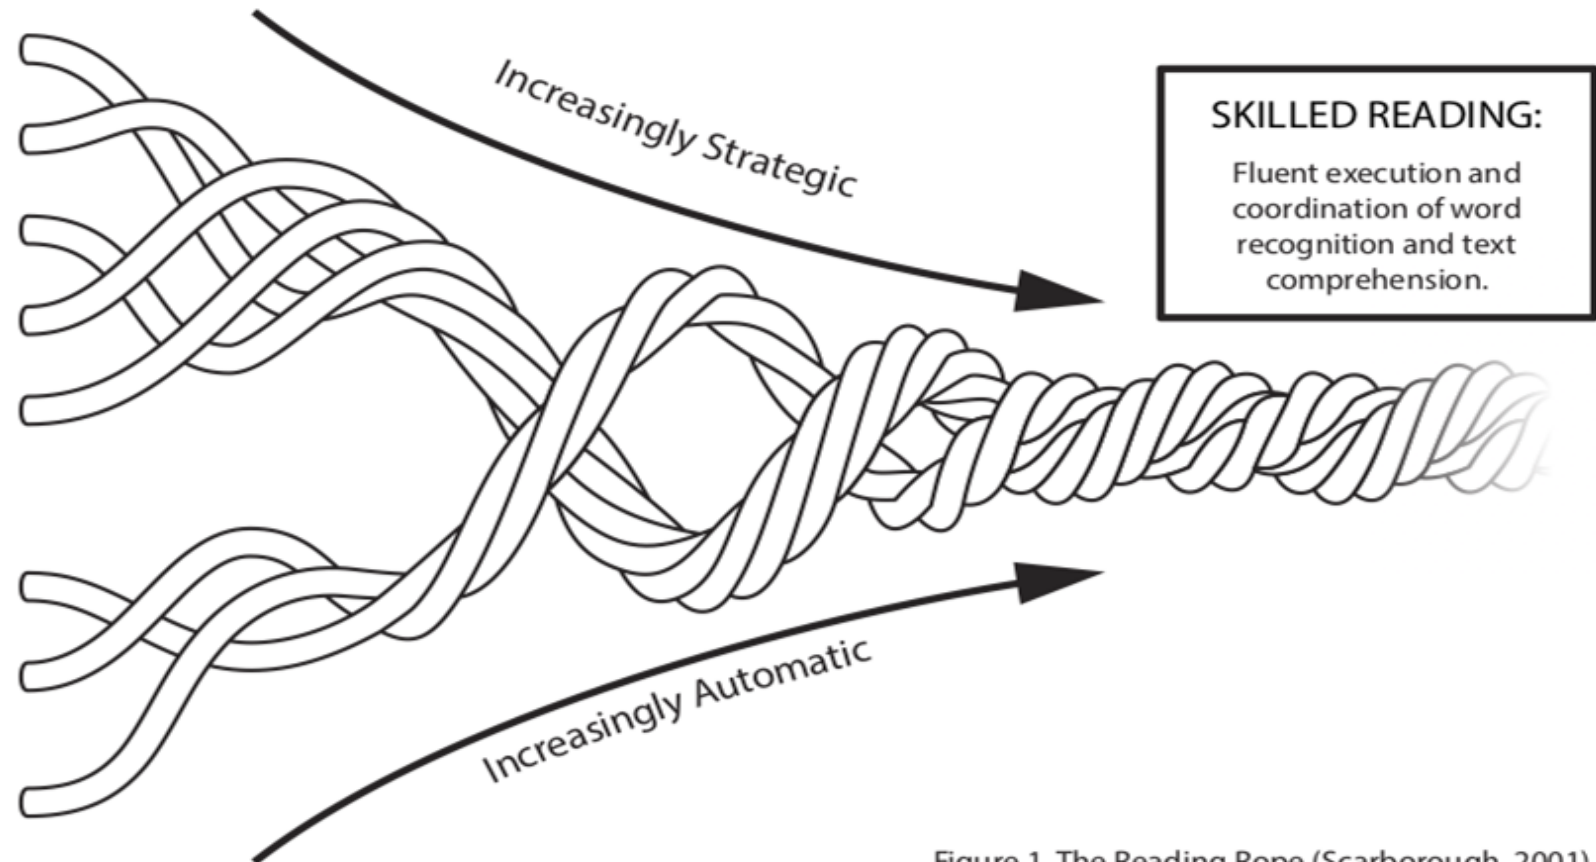

Figure 1. The Reading Rope (Scarborough, 2001)

Impact of Reading Difficulty

85%

Students in the juvenile
system

60%

In prison

75%

Black students in
California

Reading Challenges for Upper Elementary & Older Students: *A Not So Simple View*

WORD RECOGNITION

- May demonstrate multisyllabic word reading difficulties
- May have holes in single syllable word decoding (e.g., variant vowels)
- Possible phonological difficulties
- Insufficient automaticity
- Disfluent

LANGUAGE COMPREHENSION

- Oral language limitations
- English language development needs
- Lacking general and domain-specific academic vocabulary
- Limited syntactic understanding
- Difficulty with inferential reasoning
- Limited background and world knowledge

Common Reading Difficulties

SPECIFIC WORD READING DIFFICULTIES

- Phonological weakness
- Word recognition skills below average
- Average or greater oral vocabularies and oral comprehension
- Reading comprehension below average

SPECIFIC READING COMPREHENSION DIFFICULTIES

- Average or better phonological and word recognition skills
- Oral language comprehension and oral vocabulary varies, but often somewhat below average
- Below average reading comprehension; lacks a strategic approach to comprehension

MIXED READING DIFFICULTIES

- Difficulties with word recognition; non-alphabetic, inaccurate, or non-automatic word reading
- Fluency is usually below average
- Oral language comprehension and oral vocabulary varies but often below average
- Reading comprehension below average

**Adapted from Spear-Swerling 2016*

Key Intervention Needs

SPECIFIC WORD READING DIFFICULTIES

- Systematic phonemic awareness and phonics
- Fluency instruction and practice
- Support in structural analysis (morphology) and decoding multisyllabic words
- Connect spelling, reading and writing

SPECIFIC READING COMPREHENSION DIFFICULTIES

- Explicit instruction in evaluating and synthesizing information, inferencing
- Explicit instruction in syntactic structures, language and vocabulary
- Integration of writing/ reading
- Instruction in text structures
- Ample discussion/ accountable talk
- Deep development of world knowledge through texts

MIXED READING DIFFICULTIES

- Explicit instruction in word-recognition skills coupled with explicit instruction in specific areas of comprehension
- Deep development of world knowledge through texts

Examples from SoR for Word Recognition

- Phonemic awareness and letter instruction: Instruction in the identification of phonemes in spoken words and how they link to letters for the most challenged readers
- Explicit and systematic instruction in how to decode (read) and encode (spell) words, including word part analysis (e.g., syllables, morphemes) with an emphasis on multisyllabic words
- Connected stretch text reading to build reading accuracy automaticity, fluency, and comprehension, with an emphasis on accuracy and prosody for older students (Prosody has a strong correlation to comprehension)

**Examples
of instructional
practices NOT
supported by
scientific evidence in
word recognition**

- Emphasis on larger units of speech (syllables, rhyme, onset-rime) rather than individual phonemes
- Implicit and incidental instruction in word reading, visual memorization of whole words, guessing from context, and picture cues (cueing models)
- Emphasis on speed or words per minute over accuracy and prosody when reading texts

Examples of Language Comprehension Instruction Aligned to SoR

- Reading aloud from challenging texts and student reading from a variety of complex texts to build knowledge and vocabulary
- Robust conversations to develop students' academic language (e.g., narrative and inferential language)
- Explicit instruction in grammatical structures, syntax and academic vocabulary within the context of other reading activities
- Writing about texts
- Background and content knowledge through a topical approach to content from science and history
- English language development and oral language

Examples of Language Comprehension Instruction NOT Aligned to SoR

- Leveled texts
- No explicit instruction of morphology, memorization of isolated words and definitions out of context, lack of strategic and intentional instruction
- Implicit instruction of grammatical structures or no instruction in syntax

Improving Literacy in All Content Areas

1. Provide scaffolded instruction throughout the school day, including strategies to build inferencing, critical thinking, collaboration, and the knowledge and vocabulary specific to disciplines.

2. Include open, sustained discussion of content.

3. Have high standards for text, conversation, questions, and vocabulary.

4. Build motivation for and engagement with reading.

5. Teach essential content knowledge.

6. Integrate reading, writing, and discussion.

All teachers are reading teachers

- A. True**
- B. False**
- c. It's complicated**

BIUSTING THE MYTHS

**Poll
Question**

Assessment: The Vital Link

→ **Universal Screeners**

→ **Progress Monitoring**

→ **Diagnostic Measures**

→ **Standardized Achievement Tests**
(also called evaluation test or outcome measures)

What Should Tier 1 Look Like?

Strong evidence-based and content-rich curricula and practices implemented with fidelity

Differentiation and scaffolds with grade level content

Effective Early Warning System including data

What Should Tier 1 Look Like?

Data from end of prior year for universal screening

Ample opportunities to write and talk about texts

Culturally and linguistically responsive practices

Skillful teachers who know how to adjust, motivate and when to worry

Tier 2 Support and/or Tier 3

Usually extra support period or class, ideally a WIN period

Interventionist or support staff may teach this added period

Additional time during week, 3 or more times

Targeted materials

Instruction based on identified need

Progress monitoring within the intervention

A photograph of a male teacher with glasses and a beard, wearing a blue plaid shirt, leaning over a desk to assist a young female student with dark curly hair wearing a pink shirt. The student is holding a yellow pencil and looking down at a notebook. The teacher is smiling and looking at the student's work. The background shows a classroom setting with a chalkboard and bookshelves. The entire image has a light blue overlay.

Assessments to Inform Instruction

Effective Assessment Toolkit for Older Students

Screening

- Conducted 1–3 times per year
- Shows broad and narrow skills
- Standardized and norm-referenced
- Identifies risks

Diagnostic

- Identifies specific reading gaps
- Points to type of intervention, and
- Best progress measure

Monitoring

- Weekly brief assessment of target reading skill
- Shows student progress toward reading goal

Why Screen Older Students?

- Provides up to date data to plan instruction
- Identifies students who might not already be participating in intervention
- It's NEVER too late to learn to read

How Often Should I Screen Older Students?

It depends.....

- Grades 4-5: 3 times a year
- Grades 6-8: 2 times a year
- Grades 9-12: Once in grade 9 and for all new students

Remember:

- Older students have learning histories and prior records
- Consult these when possible
- Compare prior data with screening score

What if the Screening Data Do Not Identify the Learning Need?

- Screening data can show if there is a problem but will not always indicate *why*
- Diagnostic assessment is designed to identify the *reason* for the reading problem
- Examples:

Example 1

- Student shows poor accuracy on reading screener but not *why*
- Diagnostic identifies a need to learn vowel teams

Example 2

- Student shows poor comprehension on screener
- Diagnostic identifies that the student needs to learn key content area vocabulary

What Does Progress Monitoring Add?

Documents student's response to the intervention in relation to:

- Goal or benchmark
- Rate of improvement
- Evidence of disability

Example

- Maria
- Grade 6
- Screening-to-Intervention report shows
Needs to finish mastering advanced phonics
Then move on to fluency
- Systematic and explicit instruction
- Progress monitor with oral reading fluency

Screening-to-Intervention (s2i) Report

Phonemic Awareness *	Phonics & Fluency	General Reading	Read. Program	Plan	Intervention	Progress Monitoring	
			LEXILE®			Recom. Assessment	Performance

Intervention

Lesson 5: Specific Plan – Phonics and Fluency (CODE)

Some students may benefit from more targeted support in **Phonics** and **Fluency**. This graphic provides details about the development of this skill. Download, review, and use the information in this plan to support targeted instruction for your students.

Skill Development Continuum: Code The Student is learning to:

Emerging

Phonics

1. Recognize/say letters in own name
2. Know all letter names and their most common sound

Fluency

1. Begin to develop letter-sound fluency
2. Learn, then develop automaticity with the first 20 high-frequency sight words
3. "Read" short phrases and sentences (*Note that students have not learned to read per se, but know enough words by sight to engage in reading-like behavior*)
4. Read high-frequency sight words in text
5. Develop letter-sound fluency (*i.e., automaticity*)
6. Learn, then develop automaticity with the first 50 high-frequency sight words

Developing

Phonics

1. Begin to decode simple 1-syllable words (*CV, VC, CVC*)
2. Read by **recognizing** common onset-rimes (*bat: /b/-/ăt/; sit: /s/-/ît/*)
3. Read by decoding & blending all the phonemes in simple words (*CV, VC, CVC*)
4. Read larger word chunks accurately (*Common letter combinations, digraphs, consonant blends, long vowels, some vowel teams*)
5. Read increasingly complex words by decoding and using word patterns as an analogy (*read "cake", use to read "bake"*)

Fluency (*maintain 90-95% accuracy*)

1. Read with automaticity controlled text that contains common sight words and regular 1-syllable words
2. Learn, then develop automaticity with the first 100 high-frequency sight words
3. Continue to learn and develop automaticity with sight words

Advanced

Phonics

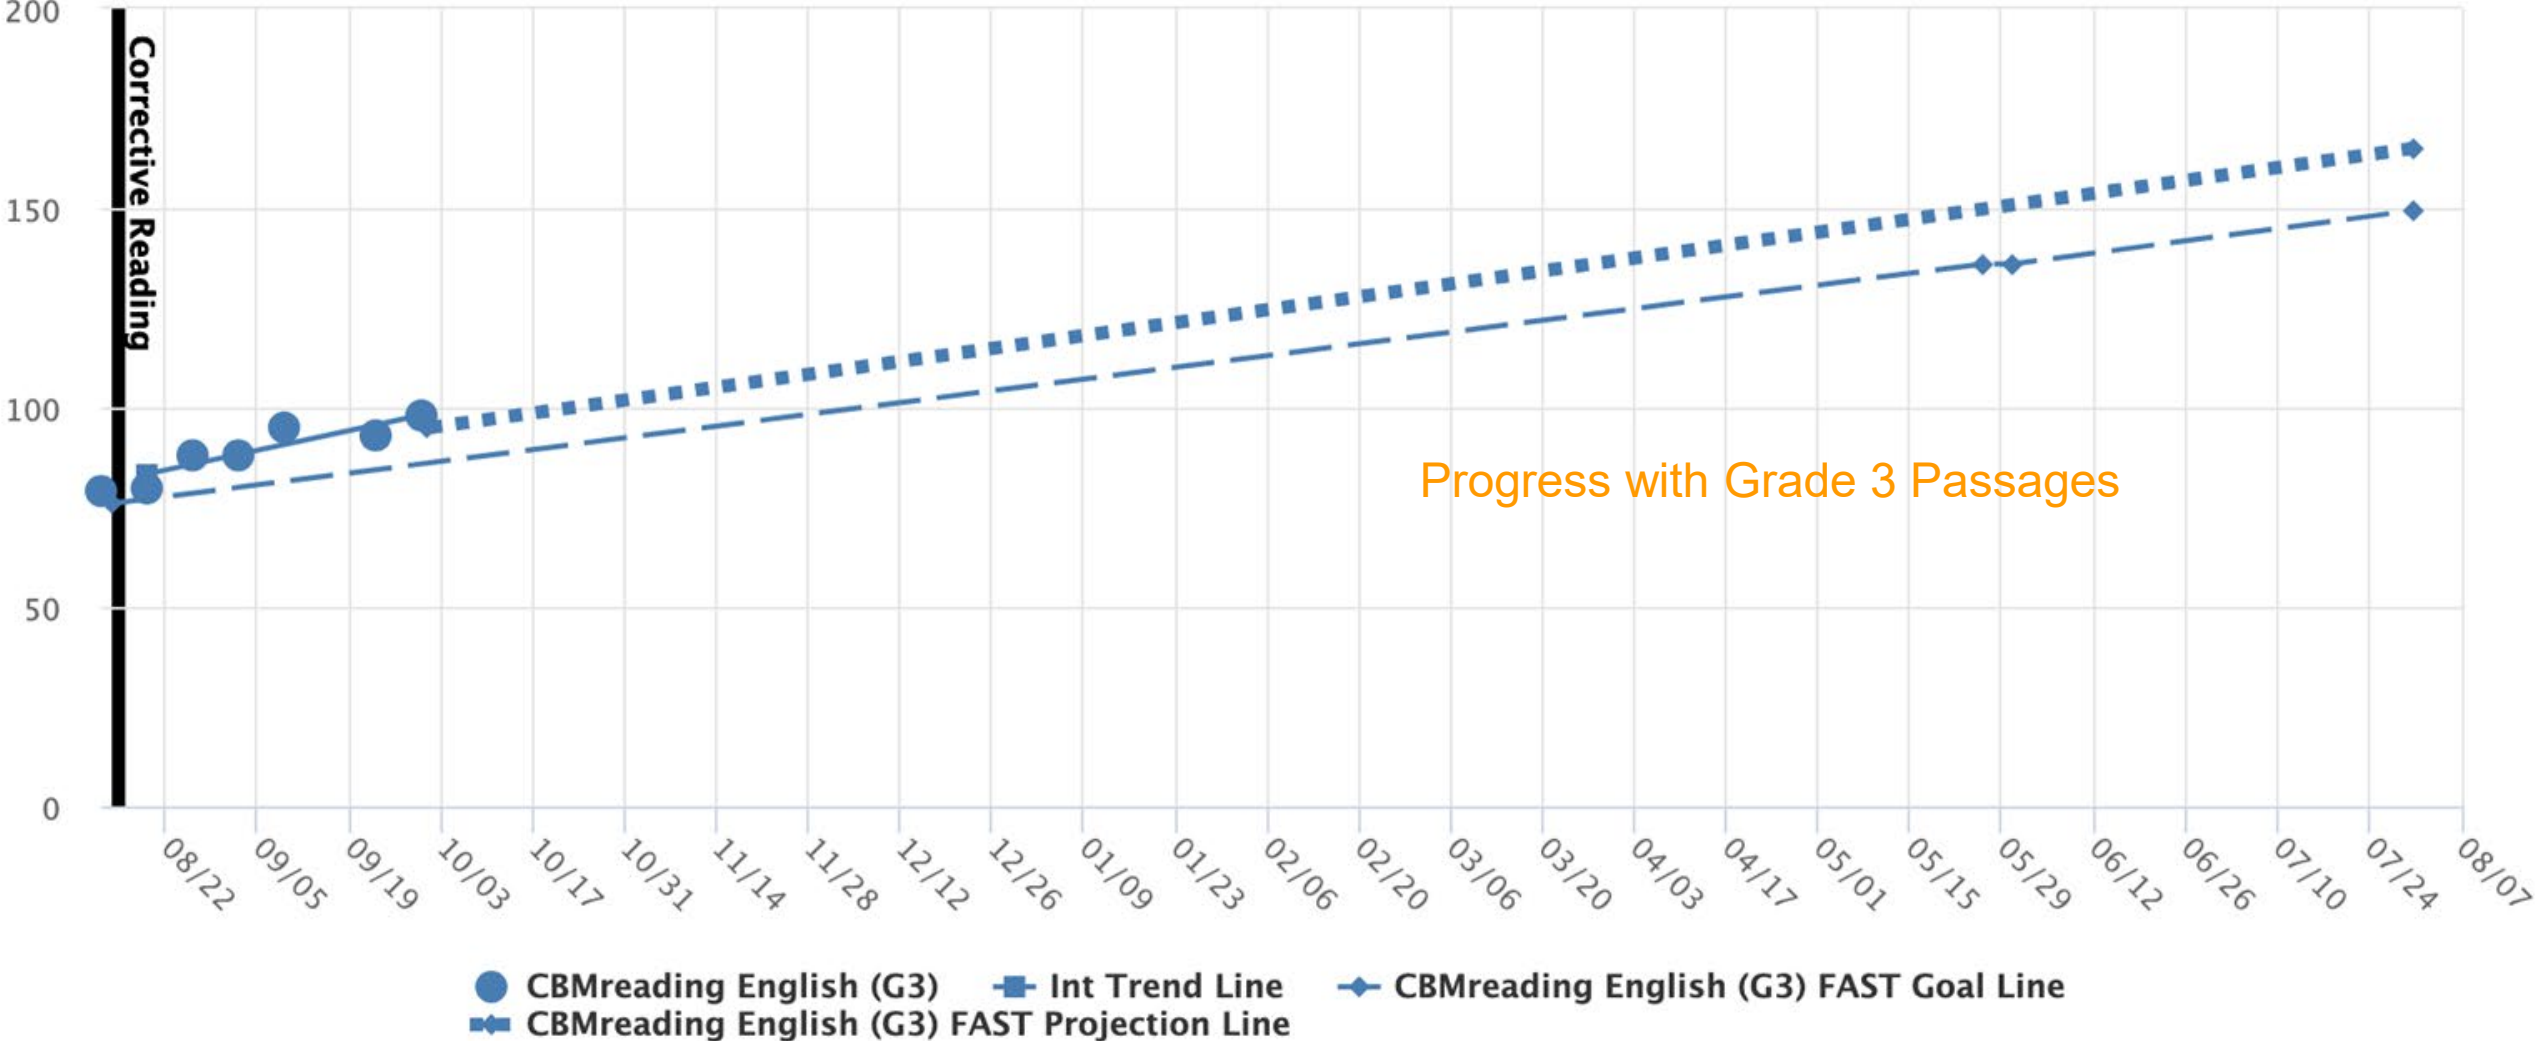

1. Use a variety of strategies (decoding, word pattern analogies) to read words with increasing fluency (*i.e., automaticity*)
2. Read increasingly advanced letter combinations along a continuum of difficulty; includes multi-syllable words
3. Increase knowledge of advanced letter combinations along a continuum of difficulty; includes common word parts, multi-syllabic words, contractions, possessives, and inflectional endings

Fluency (*maintain 90-95% accuracy*)

1. Read increasingly by sight with automaticity varied types of grade-level text that contains larger word chunks, common words, and regular and irregular 3-syllable words
2. Continue to learn and develop automaticity with sight words

Progress Monitoring

CBMreading English Progress Monitoring Report

Next Steps

- Continue core instruction with intervention to support student to reach grade-level goals
- Maria:
 - ❖ After mastering phonics, move on to fluency
 - ❖ Also incorporate vocabulary and comprehension
 - ❖ Monitor at next grade level and up to reach grade 6 benchmark

What Can Administrators Do?

What Can Administrators Do?

- Set up teacher study groups to read and discuss research
- Set up a pilot with effective SoR aligned materials and lots of support.
- Purchase a well-designed Intensive Intervention for the most challenged older students: The Third Quest (Ancora Publishing), Language! Live (Voyager/Sopris)
- Use HQIM to reduce the load for new teachers and to ensure strong content aligned to the research
- Encourage teachers to teach first starting from where they left off during shutdowns, as review, then assess. **Don't assess first.**
- Share videos from powerful models from within and outside the school
- Arrange to have teachers take a science of reading online course:
<https://www.corelearn.com/online-elementary-reading-academy/>

What Can Administrators Do?

- Another course is LETRS or courses through Glean Education <https://www.gleaneducation.com/>
- Select instructional materials consistent with the science of reading:
<https://www.thereadingleague.org/curriculum-evaluation-guidelines/>
or <https://www.edreports.org/resources/adoption-steps>
- Structure professional learning to focus on the science of reading
- Provide time for observation, feedback, and coaching support—**ESSENTIAL WITH A NEW CURRICULUM**
- Develop internal expertise
- Review data using effective and appropriate measures (NOT RUNNING RECORDS AND MISCUE ANALYSIS; use CBMs)
- Convene districtwide principal study, reflection, and data summits
- **KEEP LEARNING**

4 Actions to Accelerate Learning

Build Reading Fluency

https://achievethecore.org/category/411/ela-literacy-lessons?filter_cat=1153.
and
<https://achievethecore.org/page/3254/increasing-reading-fluency-for-middle-and-high-school-students>

Provide Extra Phonics Practice

<https://achievethecore.org/page/3290/early-reading-acceleration-practice-phonics-activities>

Scaffold Grade-level Text

<https://achievethecore.org/page/3324/quarter-turns-supports-to-access-complex-text-across-disciplines>

Leverage the Quad Text Set Model

https://achievethecore.org/category/411/ela-literacy-lessons?filter_cat=1228&sort=name

Acceleration Resources

- Use **quick assessments** such as a **CBM**
- Use a quick diagnostic to zero in on missing phonics skills: <https://www.renaissance.com/products/star-phonics/>. (formerly keyphonics)
- If your own materials are weak in word recognition, consider the following for foundational skills replacement—SIPPS: <https://www.collaborativeclassroom.org/programs/sipps/>. (K-3)
- For older students consider: *SIPPS PLUS* or *The Third Quest*. (grade 4 up)
<https://www.collaborativeclassroom.org/products/sipps-plus-3rd-ed-2/>. <https://ancorapublishing.com/product/the-third-quest-reading-intervention/>
- https://achievethecore.org/category/411/ela-literacy-lessons?filter_cat=1153
- <https://achievethecore.org/collection/6/foundational-skills-k-2#foundational-skills-k-2>
- <https://achievethecore.org/page/3290/early-reading-acceleration-practice-phonics-activities>
- <https://achievethecore.org/collection/9/early-reading-accelerators-k-2>
- <https://achievethecore.org/collection/7/knowledge-vocabulary-k-2>
- <https://achievethecore.org/collection/6/foundational-skills-k-2>
- Check out “The Third Quest’s Parallel Universe.” <https://ancorapublishing.com/product/third-quest-parallel-universe-season-1-school-edition-po/>

The Right to Read

Questions?

The Illuminate Solution

Screening and Progress Monitoring

Research-based universal screening and progress monitoring for academics and social-emotional behavior (SEB) with intervention recommendations

Assessment Creation and Administration

Highest-quality, standards-based assessments with instant scoring, formative feedback, interactive reporting, and targeted activities

MTSS Collaboration and Management

Interactive district-level to whole-child data management that strengthens MTSS implementations, including student need identification and intervention effectiveness
