

OneRoster Data Sheet

OneRoster defines two roles, a Provider and a Consumer. District Administrators will export from the Provider system, your SIS, and import to a Consumer system, FastBridge REST API-based products adopt the same concept except the exchange is system-to-system and automated. No customer intervention is required beyond basic maintenance.

Implementation timeline:

Once all items are received from the district, please allow FastBridge up to four weeks for implementation.

For more information on the OneRoster v1.1 standard, see the following links:

- <https://www.imsglobal.org/oneroster-11-introduction>
- <http://www.imsglobal.org/activity/onerosterlis>

What we support:

- OneRoster v1.1 API only

What we need from districts:

- SIS name
- REST-ful URL endpoint
- Consumer Key
- Consumer Secret
- Credentials (for FastBridge to connect to the endpoint)
- Verification that OneRoster school names match FastBridge school names exactly
- Submit FastBridge to SIS provider for vendor approval
