

Using DnA or SchoolCity for Distance Learning with Popular Learning Management Systems

Assessment is an essential support for any learning environment, especially distance learning. Providing students assessments online and embedded in learning activities not only informs students on their own learning, but empowers teachers with data to understand where they may need to provide additional support. Through analyzing the assessment data of their students, they can target their instructional supports effectively and efficiently.

Illuminate utilizes open interoperability standards to make the connection between SchoolCity or DnA with popular Learning Management Systems (LMS). Teachers use LMSs to help facilitate a student's learning activities in one online location. As students are completing these activities, an online assessment from DnA or SchoolCity can easily be one of the activities initiated from within the LMS. This keeps the student engaged and on track with all the tasks that they are to complete listed in one location.

Learning Management Systems

Students using Infinite Campus SIS can launch DnA online assessments from the Infinite Campus Gradebook (district must have Campus Learning). [Check out](#) what it looks like in DnA.

Using the LTI standard, students using itsLearning LMS can launch SchoolCity or DnA online assessments from itsLearning gradebook and receive student scores. [Check out](#) what it looks like in DnA.

Students using Schoology LMS can launch SchoolCity or DnA online assessments from the Schoology materials for a course and receive student scores. [Check out](#) what it looks like in DnA!

Students using Instructure's Canvas LMS can add SchoolCity or DnA as an external application to use SchoolCity or DnA within Canvas and receive student scores.

Here's How It Works

Your DnA administrator will simply go to the LTI Integrations area of DnA to find the information they need to connect to one of these LMSs.

For SchoolCity, or to learn more on how to get started with any of these or to request others, contact your Customer Success Manager or support at: <https://support.illuminate.com/hc/en-us/requests/new>.
