

Professional Learning Anytime, Anywhere

The Learning Community is a central part of Illuminate's mission to offer educators innovative and effective learning experiences. Our system includes dynamic e-learning modules and enhanced resources aligned to eduCLIMBER and other Illuminate solutions.

BENEFITS:

- ✓ **e-Learning** offers the ability to engage in professional development remotely with a system that is available 24/7
- ✓ **Role-specific interactive courses** to help users gain expertise in SchoolCity and master the functions most relevant to their role
- ✓ **Gain access** to rapidly growing course catalogs that include simulations, knowledge checks, and videos modules for engaging learning opportunities
- ✓ **Create a system** of accountability and track your team's progress toward completion

How Can the Learning Community Help You?

Learning Pathways

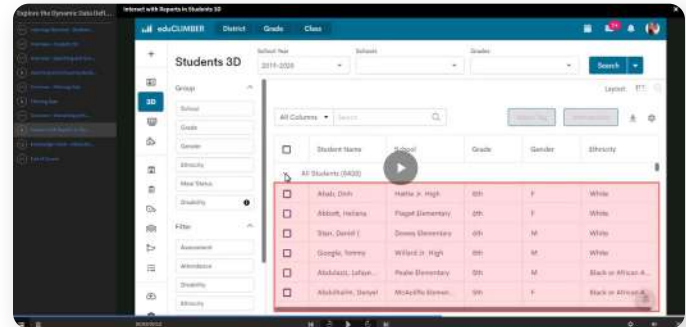

With role-specific Learning Pathways, users take only the courses that are relevant in a sequence that accelerates and supports a deeper understanding of the system. Courses feature objectives, overviews, videos, knowledge checks, and interactive activity modules to support real-world application.

Go Beyond Essential Learning

Gain access to the general catalog to go beyond *what you need to know* and into the *what you can do*. General and On Demand catalogs contain courses on advanced topics and professional learning resources to build assessment and data literacy and to promote operational efficiency and effective use. With content continuously being added, the Learning Community is a go-to source for extended learning.

Cost Effective Solution

Users get unlimited access to the Learning Community for a full year, making it the most affordable option for continuous learning.

eduCLIMBER Course Examples

- + Welcome to eduCLIMBER
- + Basic Platform Navigation
- + Set User Data Access with Security and Permissions
